

Instructions for abstracts

You: (name, place of work, email address)

Title: (maximum one line, e.g. gender, age and major findings, without patient's name or date of birth)

History, investigations, and major findings: focus on abnormal findings, do not reveal the diagnosis.

Diagnosis: Known or unknown (if the diagnosis is known, do not reveal it in the abstract!)

Maximum length 1/2 page. Be concise.

Send your abstract(s) to:

Mona Vetås mona.elisabeth.vetas@helse-bergen.no

AND

Siren Berland siren.berland@helse-bergen.no

Deadline for abstract submission is Monday August 12th, 2024.

We will send you a confirmation email when we have received your abstract(s).

Please bring your presentation(s) Tuesday August 27th as a PowerPoint file.

When presenting:

- **Start with a photograph of the patient** while you very briefly present the history and major findings. The best presentations are those with few slides (3-4), each of which includes a good patient photograph and a summary of significant findings.
- Show the best picture of your patient on the last slide with a concise summary.
- If the diagnosis is known, reveal it after the audience has had a chance to make suggestions.

Depending on the number of cases, we will have 5-10 minutes for each including time for discussion.

Because the meeting is based the exchange of knowledge among participants, your case presentations "make the meeting".

Thank you for contributing!

Sincerely,
Siren Berland
